Hello Ron,
Please save this to SEMS for Smokey Mountain Smelters.
Thank you,
Scott

Hi Scott,

I am copying Matt Robbie on this email - he's the WAM for reuse planning in the region, but this is a great first step so we can iron out the contract elements.

First a question - Bill, are you comfortable using the money Region 4 has in the contract to support this work?

Next, I would recommend setting up a call to talk to Matt Robbie (Matt, do you mind reaching out to Scott?). One of the things we try to stay on the straight and narrow about is making sure the work we do with Superfund money is on the straight and narrow with respect to being something Superfund money can be used for (so making sure it's tied to understanding reasonably anticipated future land use as that relates to selecting, implementing and maintaining remedies plus ensuring protectiveness). Matt can listen to your goals and help structure an approach that checks those boxes and then help come up with an estimate, which we can run by Bill to make sure he approves (assuming we use the Region 4 money).

I hope this is helpful! Feel free to call me with any questions or concerns.

Sincerely,
Kristin

Subject: Site reuse assessments

Hello Kristin,

Hope that you are doing well. I spoke with Bill Denman about working with Skeo on minor reuse assessments/evaluation of potential grants for Site reuse at 2 Superfund sites in the State of Tennessee.

The City of Harriman has plans to reuse the Clinch River Superfund Site as part of a riverfront park on the Emory River. In this instance, we could use assistance in evaluating potential grants for them.

The Smokey Mountain Smelters Site is located in South Knoxville adjacent to a public housing complex. The City of Knoxville and residents there have multiple ideas about potential reuses.

How do we get going on these items?

Thank you,

Scott Miller
